- Component Assessment

Training & Research

- In-house Chimney Testing
- Publications
- Seminars

Injury Analysis

- Workplace Analysis
- Electrical Shock
- Machine Failure

We specialize in...

Electrical Failure Analysis

We routinely perform investigations into electrical equipment failure. As one of our core strengths, we have remained committed to understanding and examining every aspect behind electrical failure. Synergy Technologies has executed inspections and analyses of building fires, shock injuries, vehicle fires, as well as many other electrical systems.

We also specialize in mechanical failure analysis. With years of experience in product design and engineering, we understand the intricacies of discovering damage and defects. Whether it is water damage, an explosion or a freeze-up, Synergy Technologies has the experience to conduct a cohesive and efficient investigation.
